

## Project of the Year 2007-08: Nominated Project

### COMBAT

AVL snow plow/ street sweeping/ mowing operations-orientated project.

A 4.2 million dollar collaborative project between Franklin County Engineers and the City of Columbus, OH.

The project equips 110 snow plows, 24 street sweepers and 25 mowers with state-of the art AVL equipment. Snow plows reporting includes salt spread rate, pavement temperature, air temperature, plow blade position and anti-icing flow rates. Sweeper information includes broom up/down and hopper position.

This operations-orientated job was designed and managed by in-house operations personnel. The project is currently 65% complete.

To support this effort, the project included a significant GIS map improvement and a one million dollar RF data radio system.

## Project COMBAT

Project Lead:  
**Franklin County Engineer  
(Ohio)**

Project POC:

**Michael Meeks**
